BIZERBA

**The Open World of
Finest Weighing Solutions.**
Since 1866.

Our experience sets standards

We are a family-owned company guided by a commitment to tradition, sustainability and responsibility. Nowadays, based on our core competence of slicing and weighing technology, we offer our customers the industry's largest and most unique range of products and solutions as hardware, software and services, anywhere in the world.

As a globally operating technology company we are guided by our goal and commitment to achieve maximum results in terms of ergonomic design, hygiene, safety and efficiency. We believe we have a role to play in shaping our markets, and are continually setting new industry standards.

In close collaboration with our customers and against a backdrop of technological advancement, we are working to improve our products on a daily basis—resulting in innovations which become new standards.

In order to continue to live up to these requirements, we focus on the highest possible quality standards and internationally recognized technology standards in our development and manufacturing work. This is how we best support our customers in achieving maximum efficiency and profitable growth.

Our experience sets standards.
That's what sets us apart. Bizerba
High performance, elegant appearance

The K-Class II Pro series combines high-class design with unique performance. Fitted with a fast Intel® Quad Core processor and plenty of memory, these devices are the up-to-date solution for your fresh food counter in a demanding retail environment.

Classy look, smart functionality and sophisticated ergonomics: Manage central tasks such as weighing, transcations, printing, advertising, advising and providing information with style and in an efficient manner with the K-Class II Pro series. The K-Class II Pro series impresses thanks to a strong processor performance, a large RAM and an open software architecture. Expand functionalities of the K-Class II Pro series based on what you need and when you need it with our numerous Bizerba RetailApps.

Our modular hardware allows you to stay flexible. The K-Class II Pro series can be individually adapted to your store concept and your processes. Intelligent functions simplify operation for your staff and bring economic benefits which you can measure. The optional tilt compensation Easy Level indicates the correct weight even at an angled position which prevents loss of sales.

Benefit from the advantages of the K-Class II Pro. Cover your current needs and be perfectly prepared for future requirements.

KH II 800 Pro

The KH II 800 Pro sets standards in the modern retail environment. An aesthetic design for a good feeling that your customers will appreciate: Premium quality and high value. Behind this elegant appearance you will find powerful, intelligent technology. Irrespective of the operating system for Linux and Windows, with a fast Intel® Quad Core processor, large RAM, many smart functions and software modules to choose from: Our Bizerba RetailApps.

Your staff members will benefit from intuitive operation and best ergonomics such as the adjustable touchscreen and the printer which is positioned at the same working height. Another benefit that saves you valuable time: Our special Easy Clean surface for quick and easy cleaning.

The KH II 800 Pro facilitates your processes in many ways providing you more efficiency during your day-to-day work.

Easy Clean

+ Hygienic design
+ Easy to clean due to a special surface structure
+ Insensitive to dirt, fingerprints, label glue and traces of use

Large printer variety

+ Combination printer for receipt and linerless
+ Label printer
+ Dual printer
+ Second printer can be connected (for KH II 800 Pro)
+ Easy Load for fast paper roll change

Design and ergonomics

+ Ergonomics, e.g. due to adjustable displays
+ High quality materials
+ Elegant design in white or anthracite

Inner values

+ Large RAM: Ideally suitable for new features and requirements
+ Current Windows or Linux operating system: 64 bit
+ SuperSpeed interfaces: 2 x USB 3.0
+ Open for 3rd-party software via RetailIntegratorsKit* (RIK)

Energy efficiency

+ Fanless housing
+ Wake on LAN function
+ Economical components: SSD, LED backlighting

Easy Level*

+ Tilt compensation: Automatic tilt recognition of the scale
+ Automatic weight correction: Improved accuracy
+ Prevents revenue losses
+ Smooth operating procedures

* optional

Added value
all along the line

Design and ergonomics
Our anthracite or white K-Class II Pro scales harmoniously integrate in your store design. The elegant shape and superior materials bring a noble appearance in the store. The outer appearance is not disturbed by unattractive ventilation slots thanks to a fanless housing. Components such as display and printer are ergonomically arranged for a high operating convenience. User prompting is intuitive. K-Class II Pro scales are perfectly suitable for both, the service counter and self-service.

Inner values
Digitalize your daily routine in retail with the K-Class II Pro series. With the large RAM you implement new features or individual requirements in an efficient way. Irrespective of whether you use the current Windows or Linux 64 bit operating system. As stipulated by the German GoBD, fulfill the principles of proper management and retention of books, records and documents in electronic form as well as for data access with your digital bookkeeping. Back up and transfer receipt data via SuperSpeed interface to an USB stick. Quickly create a backup. An additional advantage of the fast USB 3.0 interfaces: You directly connect peripheral equipment such as handheld scanners to your PC scale without an extra power supply unit.

Flexibility and openness
The K-Class II Pro series is not only cross-platform compatible but also compatible with common 3rd-party software. Our RetailPowerScale software transforms your scale in an all-rounder. Functions for weighing, selling, transactions, labeling, advising and advertising: You can do it all. RetailPowerScale is standardized and open, scalable and expandable. Enjoy flexibility with our hardware: The modular system K-Class II Flex Pro can be integrated in any counter environment—with freely combinable printers, customer displays in different sizes, ScalePad for direct integration in the counter surface and much more.
Avoid revenue losses
Our tilt compensation Easy Level automatically detects the inclination of your PC scale. It digitally determines the correct product weight and avoids revenue losses—always by taking into account legal framework conditions for the use. The tilt sensor ensures improved weight value accuracy at an angled scale position of up to 4°. This is ideal when scale feet are accidentally misaligned during cleaning or the scale is intended for mobile use, e.g. on market stalls having a changing ground. The simplified scale alignment lets you gain valuable time and avoid revenue losses.

Large printer variety
Combine the K-Class II 800 Pro with the perfect print solution for any use and operating mode. Choose from a combined printer for receipt and linerless, label printer, dual printer or two printers. Easy Load is a particularly quick paper roll change feature. If used as a self-service scale, RetailApp PaperNearEnd signalizes prematurely an empty label roll. This warning is issued via e-mail, displayed in the monitoring or indicated via USB warning lamp. Ensure high availability and customer satisfaction as less time is spent for waiting.

Saving energy
Our intelligent PC scales lower your electricity costs. All models work fanless. The exhaust heat is simply dissipated via the housing. A second positive effect: Dusty, warm air is not blown into the counter. Your products stay fresh for longer and the freshness area stays cleaner for longer. Unhygienic, soiled ventilation slots are a thing of the past. Also energy-saving components such as SSD, LED backlighting and Wake on LAN optimize energy efficiency: Remote, automatic shut-down of your scale after updates or at the end of the day and booting before opening time.

A software that flexibly covers all retail tasks, quickly networks your device with the back office and simply grows with your requirements. This is our response: an open and modular software architecture.

What applies to your hardware also holds true for your software: Combine software modules to your individual solution. Dock RetailApps in a simple and cost-effective manner. Remain open for 3rd-party hardware or software. Whatever digital solution you will design: With our 360° retail software you will benefit from a networked work and data flow. From the service counter up to the back office.

360°
retail software

Discover your efficient tool by means of which you centrally control retail processes, manage and analyze them. The ideal basis in order to optimize your processes.

Retail 4.0, omni-channel and corner shop. Why these topics are not contradictory you can find out by reading our Retail Magazine.

Management software

Management software RetailControl

Control your scales and price labelers with RetailControl —in a network or individually. Reduce your administrative effort and network your devices with the back office. With the monitoring software you get the same data versions on all devices at the touch of a button. Updates and modifications are targeted and happen automatically. Without on-site visits and long downtimes. No more delays during selling. Benefit from reliable, transparent and efficient processes. In terms of configuration, program version and operating procedure of your hardware.

Data management software RetailOffice

This software is your efficient tool to centrally manage and expand your master data for scales and cash registers. Even calling up and evaluating your sales from the back office becomes possible. Control your entire store system in a flexible manner with minimal time effort. From the current article price at the cash register up to new advertising on the operator displays of your scales. The perfect solution for retailers and large chain stores.

Interface software RetailConnect

RetailConnect converts data from different sources. The integrated communication driver ensures a smooth data transfer between your back office and the terminal equipment. Central and flexible data transfer—easy, fast and safe. Complete transfer of sales data to your host system for evaluation. The bilateral software makes it possible. Start the transfer time-controlled, via trigger file or remotely. Install updates outside business hours. Price changes can be centrally rolled out on your terminal equipment. Even image files are reliably transferred via SFTP.

Device software

Basic software RetailIntegratorsKit (RIK)

With the RIK your device is ready for new integrations. The standard version already includes metrologically approved components. You receive a completely runcapable and proven scale solution. The basic software provides all functions which you need to configure, calibrate or test your hardware—scales, printers, displays etc. Remain flexible in the long term with our powerful and open platform. Smoothly integrate, for example, 3rd-party software in your Bizerba scale.

PC scale software RetailPowerScale

RetailPowerScale is the key that turns your device into an all-in-one solution. Of modular design it combines standard with individuality. Utilize the PC scale software whether you are using a Linux or Windows operating system. Expand and configure the software to match your needs. Whether you are a food specialist retailer or a global retailer. Also remain flexible in terms of the use of your equipment. RetailPowerScale works independent of the platform. Easy to integrate and maintain it runs on any PC scale, tablet or wrapper.

RetailApps

Flexibly expand the functions of the PC scale software RetailPowerScale with Bizerba RetailApps. Simple, fast and cost-effective. The modular software architecture makes it possible. RetailApps are available in four central categories.

Data management
RetailApps managing process-related data.

Administration
Ideal solutions simplifying administrative tasks or processes.

Communication
RetailApps communicating in both directions: between device and customer, between device and operator.

Money
Functions managing price information and sales.

RetailApps

RetailApps combine individuality with the advantages of standard software. They are separate, self-contained solutions which can be easily docked on to the scale software RetailPowerScale via interface. Of modular design, readily available, at an attractive price—you remain flexible for any new requirement. RetailApps are available in four central categories. Our international development team dynamically expands the range: We initiate new developments and updates and are open for your wishes.

A selection of matching RetailApps can be found here.

RetailApp PowerQueue
Making optimum use of waiting times: Manage waiting times and queues at the fresh food counter. Allow your customers to optimally use their shopping time. Via RetailApp you define queuing departments. Your printer automatically provides you with queuing numbers which can be digitally displayed for your customers.

RetailApp PaperNearEnd
No more end of paper: Avoid empty label rolls on your scales, particularly in the unattended self-service area. An early warning system signalizes when a scale's label roll is almost empty. Different notification types are possible: via e-mail, in the central monitoring or via USB lamp.

RetailApp SnackBar
Actively increase sales: In a few steps the RetailApp allows you to link product suggestions to items and increase sales. The product suggestions defined and registered for the item are automatically shown to your staff on the operator display. Ideally suitable to actively take care of and advise customers.

RetailApp LasVegas
Customer conversation during shopping: The RetailApp is your perfect tool for promotional campaigns and an increased shopping experience. When closing a label or receipt, a slot machine starts on the customer display. Three matching symbols mean jackpot—that is LasVegas. Prize and winning frequency are defined by you.

RetailApp IngredientManager
Transparent product information: Stay on top of things via RetailApp and make your customers feel good for being well informed about allergens and ingredients. The IngredientManager RetailApp consists of two license modules: Allergen-Manager and IngredientFinder. You may use them either individually or in combination.

RetailApp TraceListing
Flexible origin data management: Maintain origin data of your items directly on the scale in an easy, fast and safe manner via RetailApp. Step by step and individual—whether manual input, scanning, predefined lists or the input of dates via the calendar element.

RetailApp EasyOrder
Managing a customer order without paper: Manage customer requests via EasyOrder directly on the scale—from recording and preparation up to closing a ticket at pick-up. Enter order changes via the system in a convenient way. When the merchandise is picked up you open a sales ticket. This allows your customer to purchase further items.

RetailApp ShelfTag
Correct labeling of articles from the fresh food counter: Print shelf tags directly on the scale and up to date. The RetailApp automatically recognizes relevant PLU data changes. With a single press of a button you print the latest article information. Select your tag from customizable PDF templates.

RetailApp TimedAction
Perfect timing on the PC scale: With the RetailApp, time-controlled messages are shown on the scale or campaigns carried out. Ideally suitable for optimized operating processes. Shut down your scales in a controlled manner at the end of a work day or automatically remind your operating staff to check displayed merchandise on a regular basis.

RetailAppPaymentManager
Easy integration of payment systems: This RetailApp offers four license modules. Integrate, for example, ElectronicCash EC terminals in your selling process and process payment transactions in an easy and transparent manner. CashManagement automatically returns the change amount in bills and coins. Your benefit: hygienic operating processes without direct contact with cash.

Black or White

Appearance is not everything but quite important for an upscale food retailer. A scale also contributes to a high-quality product staging since it inevitably attracts the customer's eyes during the selling process. The K-Class II Pro series is part of an upscale store atmosphere not only due to its elegant shape but also because of its color. Anthracite or white—you choose.

BIZERBA

Discover new perspectives

Experience the K-Class II Pro with the Bizerba AR app. Pick a model and visualize it on your real counter in 3D. You decide which version fits best in your store concept.

Load our free Bizerba AR app from the App store (Apple) or Play-Store (Google). The download works even faster via scan.

Apple devices   Android devices

Open and use the app wherever you see the Bizerba AR logo.

Point the camera of your smartphone or tablet* at the AR logo.

AR

BIZERBA

* The Bizerba app is optimized for the latest smartphone and tablet generations. Older devices with a less powerful processor could have problems to display the AR contents.

KH II 800 Pro

Elegant counter scale for the modern fresh food counter. Ideally suitable for assisted sales, self-service, price labeling and as a compact checkout solution.

Highlights

- High-end PC scale with a powerful Intel® Quad Core processor: More performance for optimized graphics while consuming minimum energy
- Large RAM: Ideally suitable for new features and requirements
- Current Windows and Linux operating system: 64 bit
- All-purpose printer for receipt and linerless operation, paper roll width of up to 80 mm
- Label and dual printer
- Two printers
- Easy Load: Easy to change label rolls
- Easy Clean: Easy and fast cleaning
- Wake on Lan: Increased energy efficiency

Options

- Variable weighing ranges
- Easy Level tilt compensation: Correct weight even at an angled position, avoids loss of sales
- Numerous printer types
- Second COM interface for cash register drawer interface
- EC-Cash connection
- Different display sizes
- WI-FI

For top quality and reliable performance

In your day-to-day work with the K-Class II Pro PC scale you can rely on high-quality cleaning products and original consumables in Bizerba quality. Everything is perfectly matched to your products ensuring best possible results and longevity of your investment. A perfect example of teamwork with added benefits for you.
Optimal functioning and constant availability of your devices and machines require professional care. Our high quality cleaning agents play an important role here since they are specifically developed for demanding conditions in retail, industry and food service. They are easy to use and show impressive results: perfect cleanliness providing protection as well as disinfecting hygiene for sensible components and smooth surfaces. For each material whether stainless steel, plastic or glass, we have a suitable cleaning agent in our comprehensive assortment. Clean solutions for your work area or production facility.

Our service
Professional
on-site support

We supplement the use of our K-Class II Pro PC models with optimal service. Benefit from our experience and industry know-how. Our highly qualified service experts are at your service nationwide.

In order to obtain the maximum from your investments we are there for you with a multi-level service. This includes advice, start-up and installation of the PC scales as well as other services. Our perfectly matched modules ensure continuous availability.

Service modules
- Individually agreed service contracts
- Start-up including initial training and initial installation
- 24/7 service contract, optional
- Full support (spare parts, technical competence and on-site support)
- Large nationwide network of service experts who are quickly at your service and on-site
- A broad range of cleaning and care products
- Service hotline
- Customer training

Service redefined
My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. No matter which modules you are combining into your solution, you'll benefit from planned budget costs, efficient processes and the very best Bizerba quality.
